

BONN-IT CLEAN

Detergent Rinse & Neutralizer

Bonn-It Clean effectively transfers soils from carpet fiber to cleaning pad without leaving carpet tacky. Surrounds, lifts, and suspends soils for quick cleaning of traffic patterns. Special chemical blend lowers labor costs by extending periods between full scale cleaning. Safe for use on stain resistant carpet.

■ DIRECTIONS

For bonnet cleaning, pre-treat high traffic lanes with Bonnet cleaning mixture. Apply diluted product to bonnet (via spray or immersion) and buff carpet. Replace bonnets as they become soiled. For faster dry times, re-buff area with a clean, dry bonnet.

Spray Method: Mix solution in a pump-up or pressure sprayer applicator. Generously prespray carpet and allow 5-10 minutes dwell time. Do not allow to dry. Lightly spray the bonnet pad before bonneting. As the pad becomes soiled, turn over or replace.

Immersion Method: Immerse bonnet pad in diluted solution, then wring out tightly. Position bonnet on rotary floor machine. When both sides of the pad are soiled, rinse in clear water, wring out tightly, and re-soak in cleaning solution before proceeding.

Dilute concentrate with water according to carpet soil load requirements.
