

BREAK-UP

Foaming Carbon Soil Remover

Break-Up is formulated with a high foaming surfactant designed to create a thick foam when applied through a sprayer. The thick clinging foam allows the product more time to work on the baked on grease and carbon soils. This product is designed to remove carbon deposits, baked-on food and other stubborn soils from ovens, fryers, bakeware and barbecue grills. This powerful caustic formula softens and loosens tough deposits quickly and easily, without scrubbing or scraping, allowing you to just wipe the residue away with a sponge or cloth. This product can be used in both hot or cold ovens.

■ PHYSICAL PROPERTIES

APPEARANCE: Cloudy Liquid

SPECIFIC GRAVITY: 1.023

ODOR: Citrus

pH (Conc.): 12 to 14

FLASH POINT: N/A (WATER-BASED LIQUID)

■ PACKAGING

Break-Up is available in 12x32 oz. cases and 4x1 gallon cases.
