ABOUT THIS PRODUCT

LockNLoad Jr. #8 Carpet Extraction Cleaner is a proprietary blend of low foaming surfactant, organic acids, water conditioning agents and optical brighteners.

LockNLoad Jr. #8 can be diluted directly into the solution tank of a carpet extractor or can be diluted into a sprayer. Pre-spray the carpet and then use a carpet extractor with fresh water to rinse. Once carpet and upholstery have been cleaned, a fan should be used to help the surface dry. Always make sure that the surface is completely dry before allowing regular traffic back into the area.

A color fastness test in a hidden area should always be performed before extraction on colored carpet and fabrics. This product can also be used as a carpet bonnet cleaner.

DIRECTIONS

To dispense the product, attach the LockNLoad Jr. dilution unit or adapter cap onto the Green insert in the opening of the bottle. The dispensing system is factory set to properly dilute the concentrate with water. For a water driven system, connect the system to a water line to dilute the product.

LockNLoad Jr. products are designed to be used with a dilution system. Using the dispensing system will ensure that the concentrate is diluted correctly. The green insert in the opening of the container should never be removed. If the green insert has been removed, the contents of the container and the container should be properly disposed of.

PRECAUTIONARY STATEMENTS

Prevention: Wear eye protection/face protection. Wash hands and exposed skin thoroughly after handling. Wear protective gloves. **Response:** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor/medical professional. IF ON SKIN: Wash with plenty of water for at least 15 minutes. Specific treatment (see section 4 on the Safety Data Sheet). If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.
